

## Case Study: Supply Chain Optimization at a Global Semiconductor Company

### I. Description

A global semiconductor IDM formed a world-wide supply chain group to reduce overall supply chain costs and improve service to both internal and external customers.

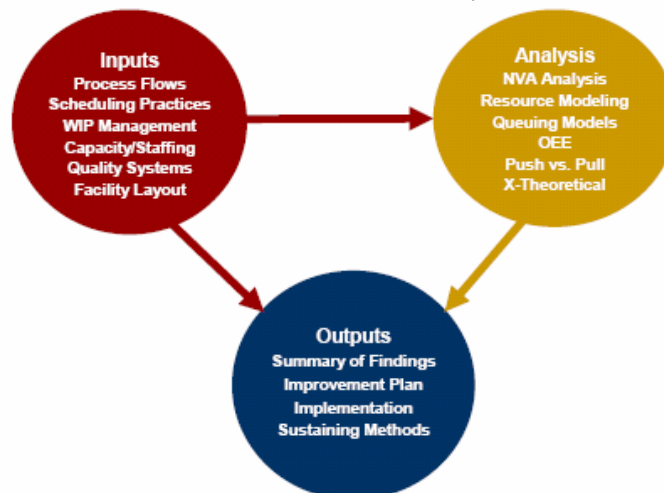

Tefen was brought in to optimize the organizational design of the new group and create a foundation for the strong service-oriented team.

### II. Methodology

- Used industry benchmarks to help identify weaknesses in the organizational structure
- Redesigned the organizational structure & business processes to improve service levels
- Developed a performance measurement system to provide visibility to the supply chain costs

### III. Results Achieved

- Identified over 15% in cycle time reduction
- Identified over \$5.5 Million in annual cost savings
